ISME 15 Bioinformatics Workshop:
Using QIIME to study microbial communities.
August 30th 2014, Seoul National University, Seoul, Korea

Members of the QIIME development group, led by Jose C. Clemente, Greg Caporaso, Daniel McDonald, Antonio Gonzalez, and Rob Knight will teach a full-day workshop on bioinformatics tools for microbial ecology. The morning will focus on lectures covering basic QIIME usage and theory, and in the afternoon students will work hands-on with QIIME via Amazon Web Services. This workshop will provide the foundation on which students can begin using these tools to advance their own studies of microbial ecology.

For details on how to apply to the workshop visit:
http://www.qiime.org/workshops/isme15-qiime.pdf

Because we expect more applications that we can accept, our goal is to give priority to applicants who will immediately be able to put into practice the skills developed at the workshop.

The cost for the workshop will be **USD$300 per participant**. Payment will be made after your application has been accepted. The workshop will be held at the Seoul National University, near where ISME 15 will be taking place. **Applications are due ~~April 22nd~~ May 20th**, and all applicants will be notified of whether or not they were accepted by May 25st.

To apply please complete the application linked below. The information requested in the application is as follows:
- Name
- E-mail address
- Position (Graduate student, Postdoc, Professor, Research Scientist, etc.)
- Affiliation
- Citations for your two most relevant publications (if any)
- A 1-2 paragraph description of a data set that you are currently analyzing or will soon be analyzing. We will treat this information confidentially and use it only for the purposes of determining priority in case we cannot accept all applicants.
